

Which TLS/SSL Certificate Do You Need?

Answer a few simple questions and find the right TLS/SSL certificate for your organisation.

Why TLS/SSL Certificates Matter

- ✓ Encrypts data and protects sensitive information
- ✓ Builds trust and strengthens your brand
- ✓ Improves SEO and user experience
- ✓ Helps meet security and compliance requirements

Step 1

How many domains do you need to secure?

One domain

Multiple domains

Single Certificate

Secure a single domain
(www.example.com)

Wildcard Certificate

Secure a domain and all its subdomains
(career.example.com, login.example.com, event.example.com)

Does not work with EV

SAN Certificate

Secure multiple domains, websites and services
(www.example.com, www.example.net, www.example.org)

Step 2

What level of validation do you need?

LOW
